

# Lockout/Tagout for Facilities Maintenance 1 Day

---

This course is designed to give the technician the most in-depth electrical LOTO training in the industry and to give those who lockout machines out the information they need to safely and effectively perform lockout on their equipment. Students will gain an understanding of Lockout requirements, and best practices, and will leave with a better understanding of performing lockout the right way vs. the wrong way. Meets CBRE guidelines for LOTO Training and Visual Verification.

---
